

Privileged Access Management

Ready or Not, it's Here.

WE'LL WORK WITH YOU ON THE RIGHT PAM SOLUTION

It's a complicated requirement. We can help.

Gartner defines the privileged access management (PAM) market as a foundational security technology to protect accounts, credentials, and operations that offer an elevated ("privileged") level of access. Due to the recent surge in cyber incidents globally, PAM is now considered a baseline control that every organizations must implement.

Across all industries, the demand for stronger cybersecurity has become a core requirement — particularly from insurance providers-adding complexity to PAM implementation efforts.

While large enterprises often struggle with PAM due to its technical and operational challenges, the burden is even greater for small and mid-sized organizations, who often lack the in-house expertise to navigate implementation alone. **That's where SDG comes in.**

RIGHT-SIZED SOLUTION. VENDOR AGNOSTIC. TURN-KEY IMPLEMENTATION.

As your partners, we will help remove complexity and challenges by assisting with:

1. Vendor Selection

Having the right vendor makes all the difference. As the leading integrator for the top PAM vendors, we provide vendor-agnostic recommendations.

2. Roadmapping Your Path Forward

The project doesn't end after picking a solution — we help you strategically plan and articulate the entire lifecycle of the process for your team and stakeholders.

3. Solution Implementation

Most PAM solutions have been designed for enterprise clients. We make sure the solution is tailored to your needs, with a focus on reducing the complexity & accelerating time-to-value.

OUR STREAMLINED PROCESS

WHY SDG?

Our History of Success with PAM

SDG has delivered over 120+ PAM and EPM engagements successfully. With minimal onboarding time required, you can be confident we'll move you forward with agility and precision.

PAM-Focused Specialization

SDG specializes in Privileged Access Management solutions, striving to do it better than anyone else. Our broad range of service capabilities covers the complete implementation lifecycle.

We Understand Cybersecurity

With deep industry knowledge and unrivaled expertise in Privileged Access Management (PAM), we are uniquely positioned to deliver exactly what you need. You don't need to navigate this complex situation on your own.

Experienced Team of Technical Experts

It's not just about having the right technology; it's having the right team on your side. All our engineers have multiple PAM solution-specific certifications as well as broad IT & cyber security experience across many industry verticals.

READY TO GET STARTED? REACH OUT FOR A FREE CONSULTATION.

What you can expect:

- 🕒 We will discuss your unique challenges
- 🌐 We will explain the vendor/solution landscape
- 🔍 We will walk you through various PAM capabilities
- 📋 We will explore the minimum viable deployment you need to have in place to be compliant with security and regulatory requirements
