

Enterprise-Ready Privileged Access Management with Accelerated Delivery

WHY PAM, WHY NOW?

Privileged Access Management (PAM) is central to advancing Identity-First Security and operationalizing Zero Trust. As ransomware, credential-based attacks, and phishing campaigns grow more sophisticated, CISOs must shift focus to identity as the modern perimeter. Protecting privileged access is no longer optional—it's a baseline requirement for reducing enterprise risk.

In a hybrid, identity-driven environment, privileged access spans far beyond administrators. Today's threat surface includes non-human identities like APIs, service accounts, IoT devices, and AI workloads, all with potential access to critical systems. A forward-looking PAM strategy, integrated with Machine Identity Management (MIM), enables organizations to enforce least privilege, contain lateral movement, and reduce the blast radius of a breach. It also strengthens audit readiness and ensures alignment with evolving regulatory mandates.

SDG offers a full suite of PAM advisory and implementation services that help organizations secure privileged credentials, enforce least privilege, and meet compliance mandates. With proven delivery frameworks and proprietary accelerators, SDG ensures efficient rollouts and long-term success across complex enterprise environments.

KEY CAPABILITIES

SDG's PAM services are designed for organizations who need a fast, scalable, and effective way to reduce risk and elevate their security posture—without derailing operations.

-  **End-to-End PAM Expertise:** From strategic roadmapping to full-scale implementation, SDG supports the entire privileged access lifecycle.
-  **Accelerated Deployments:** Reusable toolkits, delivery accelerators, and proven frameworks ensure you move fast—while avoiding risk.
-  **Vendor-Aligned Execution:** Deep alignment with the industry's most innovative and respected technology providers ensures seamless, secure integrations.
-  **Beyond Technology:** SDG provides the change management, KPI reporting, and business alignment needed to make PAM stick and ensure business value.

ELITE-CERTIFIED PARTNERSHIPS DRIVING PAM EXCELLENCE

SDG drives PAM innovation via deep engagement with our technology partners and is backed by the highest level of certifications from these leading vendors.

BUSINESS BENEFITS OF OUR SERVICE

Our proven advisory and implementation services help you lock down privileged access, strengthen your security posture, and stay compliant—without slowing down progress.

- Faster time-to-value:** Accelerators, proven delivery frameworks, and experienced teams reduce implementation timelines—so you can see measurable security improvements and ROI in weeks, not months.
- Stronger risk posture:** By enforcing least privilege, securing credentials, and eliminating standing access, SDG helps organizations significantly reduce the attack surface and meet compliance mandates with confidence.
- Cost efficiency:** Our delivery model leverages reusable components, right-sized licensing strategies, and shared success models—lowering total cost of ownership without compromising outcomes.
- Scalable solutions:** SDG designs PAM programs that grow with your business, whether you're managing hundreds or thousands of identities across cloud, hybrid, or on-prem environments.
- Confidence in delivery:** With a track record of successful enterprise implementations and deep alignment with leading PAM vendors, SDG ensures projects are executed predictably, securely, and with minimal business disruption.
- Cyber resilience:** PAM is a foundational control for zero trust and breach containment—our services help embed privileged access governance into your broader cybersecurity strategy for long-term resilience.

WHY CHOOSE SDG?

Our PAM practice is distinguished by certified experts, long-standing relationships with top vendors, and a hands-on approach to innovation. We not only implement cutting-edge solutions, but we also integrate them deeply into your security and business workflows to ensure sustained success.

- Superior Client Satisfaction:** Exceptional service backed by innovation and experience that meets and exceeds expectations over and over again.
- Value-Based, Measurable Approach:** Aligning strategy with business objectives for a measurable impact that drives value for your organization.
- Technology-Agnostic Guidance:** Independent, objective recommendations that work with your unique strategy.
- Industry Expertise:** Decades of experience advising Fortune 500 companies on cybersecurity, identity, and risk management.
- Customized Solutions:** Tailored recommendations that fit your organization's specific needs and regulatory requirements.

ABOUT US

With more than 30 years of experience partnering with global enterprises on complex business and IT initiatives, SDG is a trusted provider of advisory, transformation, and managed services. The firm empowers organizations to strengthen cyber resilience by integrating AI into identity, threat, and risk management solutions that protect digital assets and deliver measurable business value.
