# Digital Collaboration Services
# Drupal Practice

SDG's Drupal Practice works hand-in-hand with you, your stakeholders, and implementation teams to evaluate current strategy, each website's design and functionality, map content from legacy environments, and provide best-in-class ongoing site support, technologies, and enhancements.

*SDG has a balanced mix of expertise and experience in Drupal and offers the following services:*

- Site Audit
- UX and Design
- Performance & Tuning
- Maintenance & Support
- Module Development

- Content Strategy
- Theming
- Cloud and Infrastructure
- 3rd Party Integration
- Content Migration

## About SDG

*SDG empowers forward-thinking companies by partnering seamlessly to strategize, create and implement innovative business and technology solutions that help clients manage IT risk and enable growth. SDG combines industry-leading consulting an advisory experience with specialized implementation services and products portfolio to deliver robust and scalable solutions for compliance, security, risk management and collaboration.*

*SDG works with companies throughout their collaboration journey via a rich portfolio of Portal and ECM services and technology solutions. We offer industry-leading platforms including Microsoft SharePoint, Drupal, Joomla, Wordpress, Vignette, and LifeRay – and have helped our clients derive maximum mileage from their technology investments.*

**SDG**

**[ technology + passion ] – risk**
